

## Landscape Lighting

Nothing showcases your home more than properly functioning landscape lighting on a beautiful Florida evening. However, when your landscape lighting doesn't work or you don't have landscape lighting, the Wizard can help.

It is one of the most dramatic improvements you can make to your home...front yard or back. Landscape lighting is breathtaking in its beauty and provides a safe, secure and welcoming environment to come home to. Also, low voltage landscape lighting is affordable, effective and is a primary deterrent to residential crime.

Pathways, ponds, statues, trees, and shrubs all produce a serene environment when landscape lighting is applied. Landscape lighting is a great way to line your driveway or sidewalks.

Nothing else enhances your garden or yard at night better than exterior lighting. It

provides an ambient effect to trees, shrubs and flowers. Garden lighting also has a practical side. It is a great way to mark pathways or accent garden areas. Get the full use out of your garden, yard and patio areas by adding decorative landscape lighting to your outdoor spaces. With outdoor lights you will also feel safer in your yard as you come home to relax in your garden. A garden with low-voltage landscape lighting can bring a whole new setting to the home and provide the perfect spot for outdoor entertaining.

Landscapes and structures emerge at dark under subtle outdoor landscape lighting to create wonderful shapes in hauntingly beautiful sculptured drama. To brighten up an overall outdoor look, highlight a home's best features or that of special architecture, you can create an effective low-voltage landscape lighting system.

If your landscape lighting is experiencing problems...or, you don't have landscape lighting, let Electrical Connections light up your outdoors today.
